

HMS Presents...

*The only newspaper
that hits the peak.*

The Mountain Top

The Mountain Top is written by fifth, sixth, seventh and eighth graders who are part of the first session of the HMS Newspaper Club 2018-19. This club is generously funded by the North Haledon PTO. The PTO's sponsorship created this opportunity for our club members and for our readers. Thank you PTO!

😊 Happy Reading! 😊

INTERVIEW- Ms. Talarico

**By: Tyler Carrozza, Isaiah Espinosa,
and Thomas Winkler, Gr. 7**

What made you want to start teaching?
I always acted as a teacher by forcing my brother to let me teach him. I thought it was fun.

Where did you go to college? Did you always study teaching?
I went to The College of New Jersey and started out as a psychology major.

Where did you first start teaching?
Palisades Park

How long have you been teaching?
I have taught for 14 years. This is my 15th year.

What grades have you taught?
I have taught 1st, 2nd, 4th, 5th, 6th, 7th, 8th, and high school.

What subjects are you able to teach?
I am able to teach social studies, math, and language arts.

When teaching social studies, what are your favorite topics to teach?
My favorite topics to teach are: The American Revolution and The Constitution.

Besides pottery, what are your hobbies?
Crossword puzzles and reading.

Have you ever played any sports in your past and do you play any sports now?
As a child, I played softball and soccer. Currently, I do not play any sports.

What is your favorite book and why?
Sherlock Holmes, because I love mystery. I tried figuring out who did it before Sherlock Holmes did.

What is your favorite movie and why?
Rear Window, by Alfred Hitchcock, because it is a mystery.

If you could meet anyone famous who would it be?
Thomas Jefferson, because he was fascinating, and he loved to read like me.

If you had one wish, what would it be?
No more snow and no more ice!

INTERVIEW- Mr. Abdelmalak

***By: Tyler Carrozza, Isaiah Espinosa,
and Thomas Winkler, Gr. 7***

Where did you go to college and did you always study teaching?

No, I didn't go for teaching. I went to Montclair State University and started medical school. When that didn't work out, I went to teaching.

What made you want to start teaching?

I love kids.

How long have you been teaching?

Approximately 3 years.

Have you taught in any other schools?

I was an aide in another school, but not a teacher.

Besides science, have you taught any other subjects?

No, I have not taught any other subjects.

What grades have you taught?

I have taught 6th, 7th, and 8th grade.

What is your favorite science topic to teach?

Anything related to chemistry.

Who is your favorite scientist and why?

Einstein, because he thought outside of the box.

If you could meet anyone famous, who would it be?

I wish I could meet Abe Lincoln.

How long have you had a motorcycle? Is it hard to ride?

I've had a motorcycle for years and when you're skilled, like me, it is not hard to ride. I have great hand-eye coordination.

What sports have you played? Do you play any now?

I have played a lot of sports including football, soccer and pickleball.

#undefeated #2007 #kingofthepaddle

What are your hobbies?

I like long walks on the beach, singing, and combining the two.

INTERVIEW- Ms. Santos

***By: Tyler Carrozza, Isaiah Espinosa,
and Thomas Winkler, Gr. 7***

Where did you go to college?

I worked on my undergraduate at Ramapo College and I completed my Masters at Jersey City University.

How long have you been teaching?

I have been teaching for 4 years now.

Have you worked in any other schools?

Yes, I worked in Wilson Elementary School in Lodi.

What subjects are you able to teach?

The subjects that I am able to teach are ELA and Library Media.

What made you want to start teaching?

My mom has been a teacher for a long time, so growing up I always wanted to be a teacher. I also like teaching.

Have you played any sports?

In high school, I played volleyball. I was a cheerleader and was also in a marching band.

What are your hobbies?

In my free time, I like to read and I love to run Spartan races.

What is your favorite book?

My favorite book is The Great Gatsby.

What is your favorite genre to read?

I like to read mystery and adventure books.

If you could be one character in a book, who would it be?

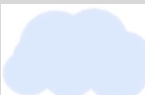

I would be a character from the Harry Potter series. I would probably want to be Harry, so I can experience Hogwarts and everything.

DOODLE FOR GOOGLE CONTEST

By: Ryan Scudieri, Gr. 6

The entire school has the choice to participate in the Doodle for Google contest. The theme for this year is- "When I grow up, I hope..." A person who wants to enter can create anything as long as it has the letters: G O O G L E in the design. At HMS, students can also enter our school competition. Those placing 1st, 2nd and 3rd will appear on our school district website. This year's Doodle competition prizes from Google are: "\$50,000 technology package for school/non-profit organization, \$30,000 college scholarship, a trip to Google headquarters in California, Google hardware, and Fun Googley swag". Deadline is Monday, March 18th!

Doodle for
Google

 The 2019 Doodle for Google theme is:

When I grow up, I hope...

This year's theme invites you to show us what you hope for in your future. Classrooms on Mars? Shoes that can fly? Food for everyone? A pill that cures everything? Take your ideas and put them into your Doodle!

ART NEWS- 7th Grade Projects

***By: Tyler Carrozza & Isaiah Espinosa,
Gr. 7***

In art class, we created radial design projects. The project consisted of our names written in different angles, where it came to a point at the center of the paper. To start this project, we needed to fold a piece of paper in a certain way to make a triangle. Then, we needed to write our name on each folded piece. We used either a light box or the windows in the halls to help us trace. After we finished writing our names on all the sides, we colored it and hung it up in the halls.

ART NEWS- 6th Grade Projects

By: Ryan Scudieri, Gr. 6

During the first marking period in Art, we worked on an onomatopoeia project. We started by thinking of a sound that you hear in everyday life, such as a click or someone turning the keys in a door. We turned the word into a picture on a piece of newspaper. Then, we mounted it on a construction paper and hung it in the halls.

SPANISH NEWS- 6th Grade Projects

By: Zaid Mahmoud, Gr. 6

The 6th graders worked on making monsters in Spanish. We had to create a monster and then label five body parts in Spanish. We worked on our monsters for about a week and then presented to the class.

BOOK REVIEW- A Wrinkle in Time

By: Chloe Muller, Gr. 5

A Wrinkle in Time is a beautiful, exhilarating story in which a girl needs to find her father who is lost in time and space. In the process, she needs to save the world as well. The main character's name is Meg. With help from her brother, Charles Wallace, and a boy from school, named Calvin, Meg sets out to find her father. Three figures named Mrs. Which, Mrs. Whatsit, and Mrs. Who appear to aid the children on their way and to show them what dangers lie ahead.

Meg, Charles Wallace, and Calvin travel in space to different planets like Uriel, the 2D Planet, Happy Medium's Planet, Camazotz, and Ixchel. When they travel to Camazotz, they discover a world in which everybody is exactly the same and everybody thinks the exact same way. Meg, Charles Wallace, and Calvin find Meg's father and they soon realize that the danger, also known as IT, tries to overwhelm them and make them become one of the poor puppets on Camazotz. They are able to escape and go home. Meg's family is reunited and life is better. *A Wrinkle in Time* is a story that will always be remembered.

8th Grade Projects- Emotion Plates

DECK THE HALLS- 5th Grade

By: Chloe Muller, Gr. 5

The fifth graders decided on a theme that was a mix of Christmas cheer and a Winter Wonderland. We accomplished this by making snowflakes, snowmen, candy canes, and presents. We made Christmas trees to go with the presents and wrote inspirational quotes on the snowflakes. Snowflakes were made by folding filter paper and using scissors to cut shapes in the paper. Hearts, circles, diamonds, and squares appeared on the snowflakes after being cut. Pieces of paper cut into circles were taped or glued together to make snowmen. They were then decorated with marker, crayon, or colored pencil. Candy cane and present shapes were cut out, colored and decorated. Inspiration for the winter scene came from watching movies pertaining to the Winter Wonderland theme.

DECK THE HALLS- 6th Grade

By: Riley Kozlowski, Gr. 6

The sixth graders theme for Deck the Halls was inspired by gingerbread and Candyland. We made gumdrops that had kind and inspiring quotes on them and hung them on the roof of our gingerbread house. Everyone made their own gingerbread man which were hung on the lockers. On the walls of the hallway, we placed decorated candy canes. In the corner near the gingerbread house, we put up a tree and created presents from construction paper. To top it off, we added lights to the top of the lockers which made it look even better. Even though, we didn't win the contest, all of the sixth graders worked hard to make the hallways festive and positive.

DECK THE HALLS- 7th Grade

*By: Tyler Carrozza, Isaiah Espinosa,
and Thomas Winkler, Gr. 7*

On December 21st, the seventh grade completed Deck the Halls with a theme of kindness around the world. We started out by making flags from different countries. Our class decorated ornaments and put flags, positive quotes, and kindness on each one in different languages. While we were hanging them, other students wrapped boxes with wrapping paper and made presents out of them. We then made a tree and put the presents under it. We also put some of the flags on the tree and around it. Our class worked hard to make sure that each item had a positive quote on it. Our goal was to spread kindness around the school!

DECK THE HALLS- 8th Grade

By: Royal Kozlowski, Gr. 8

In the eighth grade hallway, our theme was Charlie Brown Compliments. On our lockers we had presents with compliments to the people who occupied the lockers. The tag had the compliment written from one student to another. Then we had lights with positive thoughts written on them. The lights were colored and the positive thoughts were also made by the students. We had popular Charlie Brown characters on the windows and walls. We taped red paper to make the lockers look like gifts. One of the 8th graders handmade the Snoopy and Woodstock himself and it turned out awesome!

Trip to Rome and the Italian Countryside

By: Chloe Muller, Gr. 5

In 2017, I went to Italy with my mother. I traveled the countryside of the Abruzzo Region, and Rome, the eternal city. I visited many historical and cultural sites, such as Vatican City, which is the smallest country in the world. It is located in a capital of a country. It was worth it to take a guided tour and learn a lot of new information. I enjoyed beautiful pieces of art from several famous sculptors and painters such as Michelangelo. I saw the Colosseum, a 1,949 year old wonder that was built in 70 anno domini (AD). The modern day Colosseum is in ruins from an earthquake in 1349, which destroyed much of the outer southern side of the architecture. Fortunately, most of the building survived and can now be viewed by those who would like to.

The Colosseum was the place that hosted Gladiator fights. The men fought with each other, as well as animals. They were injured and even killed in the fights. It was a very dangerous activity, but paid well if gladiators were free men and fought well. Sadly, this was done for entertainment and it was as cruel as it sounds. The last known gladiatorial fight in Rome was on January 1, 404 A.D.

In Rome, the oldest fountain in Italy can be found. It is called the Trevi Fountain. The Trevi Fountain was completed in 1762 and has been a tourist attraction ever since. Did

you know that the fountain was built from the same material as the Colosseum? In addition, it has been featured in multiple movies and has even been replicated at Epcot in Disney World! But, many horrible things have happened to the fountain. In 2007, a vandal dumped red liquid substance into the fountain, turning the water red. This caused the water that fell from the fountain to also be red, since the fountain used a closed circuit water system. Many feared that the red liquid combined with the water would permanently damage the monument, so the water inside the fountain was quickly drained. Thankfully, there is no damage shown today.

According to an old legend, visitors should stand with their backs to the fountain and throw coins with their right hand over their left shoulder to ensure they'll return to Rome in the future. Did you know that it is illegal to fish out coins from the Trevi Fountain? A gang of thieves often stole coins from the fountain at night. Three were even caught by a hidden camera in 2011. The most famous raider was nicknamed d'Artagnan. He raided coins from the fountain for 34 years until he was caught in the summer of 2002.

We also traveled to the Italian Countryside, and had the world's best gelato, in a small village called Sulmona. The line outside was a mile long, but it was worth the wait! No wonder it earned Europe's best gelato award 2 years in a row! Continuing our ride, we arrived in another small village that is

not too far away from Sulmona. Its residents can enjoy a breathtaking panorama of the surrounding mountains daily. The village was built into the mountain and has only necessities! A doctor, an elementary school, a bakery, a butcher shop, narrow, curvy cobblestone streets, and lots of smiling, curious faces. The nearest grocery store is a few miles away, but the village is nice and quiet. The majority of the villagers do not speak English though. We stayed at a friend's house for a few days and I enjoyed socializing with her children.

In Italy, there is more than just the pizza and pasta, there is a whole culinary empire! For breakfast, we enjoyed cappuccinos, traditional bread and jam, and different types of cookies. Our appetizer for lunch was cantaloupe and prosciutto. Then, on to the main course which we would eat a variety of foods ranging from beef to seafood, salad to cheese. Finally, for dessert we would eat tiramisu. It is a coffee-flavored dessert made of ladyfingers soaked in coffee, layered with a mixture of eggs, sugar, and mascarpone cheese, flavored with cocoa. It did definitely "carry me up" as its name stands for. Dinner would also be a variety of meats and yogurt with fresh fruits or gelato for dessert.

Who doesn't know the basic pizza and toppings? Most will imagine it with tomato sauce, cheese, and pepperoni, but there is more to the story. Pizza was created on June 11, 1889, to honor the Queen Margherita of Savoy. The Neapolitan pizza

maker Raffaele Esposito created the "Pizza Margherita", a pizza garnished with tomatoes, mozzarella, and basil, to represent the national colors of

Italy as on the Italian flag. There is also more than one type of pizza. The Pizza Napoletana, the Pizza Romana, The Pizza Siciliana, the Gourmet or Tasting Pizza, the Pizza All Italiana, the Pizza al Taglio, the Pizza Frita, and the Trapizzo. All together there are 8 different types of pizza.

Pasta is also an Italian favorite. There are roughly 300 different types of Italian pasta. Here's a fun fact: Pasta is actually not created by Italians, it was created by the Chinese. The only difference between Italian pasta and Chinese noodles is that pasta is created when wheat flour is mixed with water. Chinese noodles are usually made of rice flour. It is simply extremely finely milled rice. This is the most basic type of pasta and the flour can be alternated between dough made of grains too.

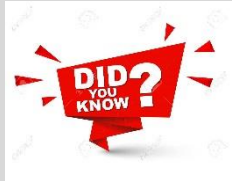

From food, to history, and the city to the countryside, there are so many things that are unique about Italy. In conclusion, Italy is one of the most historic, diverse, and beautiful countries in the world!

ROCKETTES

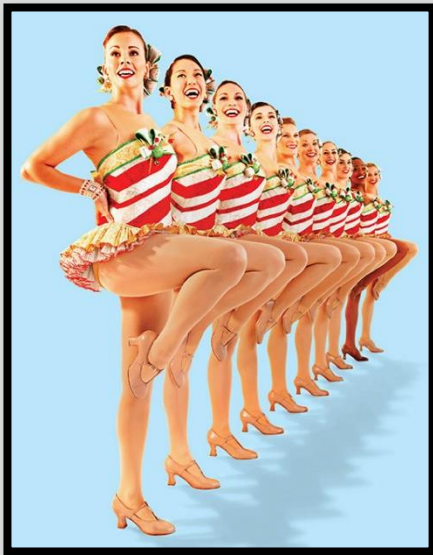

By: Hunter Lisi, Gr. 7

During the holiday season, many people like to go to Radio City Music Hall to see the famous Rockettes.

Typically, each Rockette receives a paycheck of between \$1,400 and \$1,500 each week. Because these

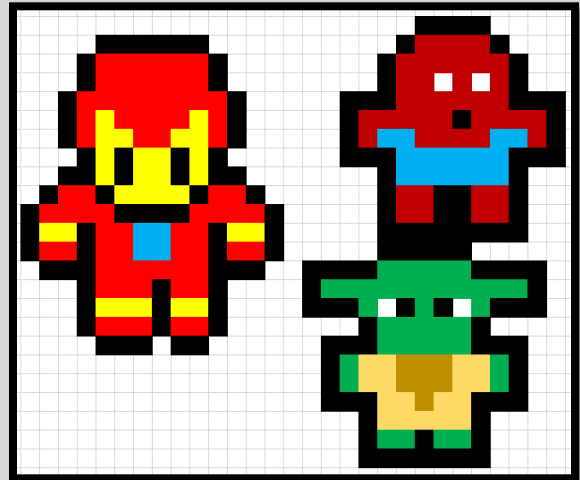

dancers perform seasonally, this makes their salary between \$36,400 to \$39,000 per year. The women who audition to be a Rockette has to be between 5' 6" and 5' 10 1/2" tall (not counting the high heels). In kick lines, they stand with the tallest women in the middle, moving down to the shortest on the ends. Auditions are usually held in New York City and are open to anyone at least 18 years of age. There is technically no age limit, but unless you are fit and have the stamina and endurance to dance six times a day at the height of the Christmas season, you probably should take a pass.

PIXEL ART- Super Heroes

By: Hunter Lisi, Gr. 7

The pictures below are Super Heroes that I created as pixel art using Microsoft Excel. I created The Flash, Spiderman and Yoda from Star Wars.

PIXEL ART- Anime

By: Zaid Mahmoud, Gr. 6

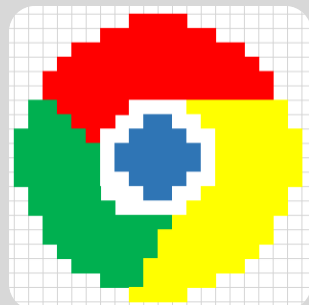

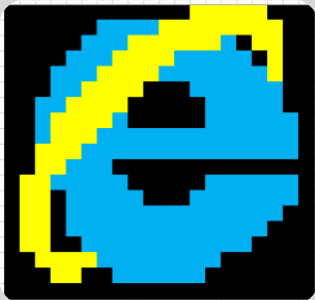

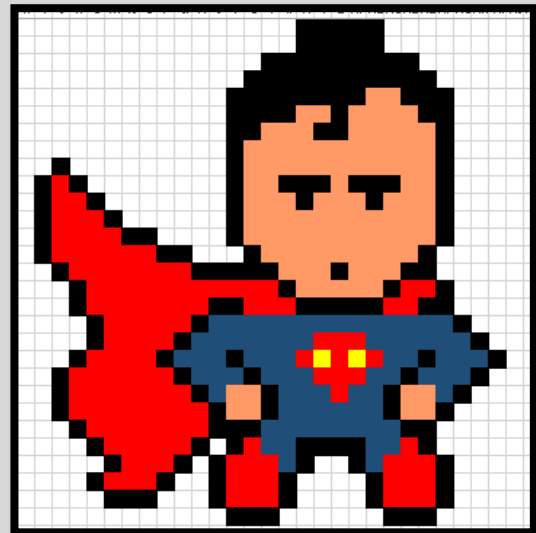

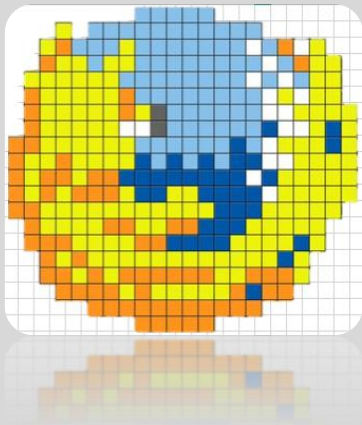

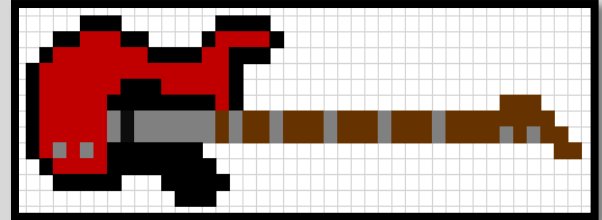

PIXEL ART- Internet Browser Logos

By: Ryan Scudieri, Gr. 6

The pictures below are pixel arts that I created of the three most used web browsers. The first one is Firefox. It is most commonly used in OS's (Operating Systems). The bottom left one is Microsoft Edge. It is only really used in Windows, but it is still popular. Lastly, Google Chrome is on the bottom right. It is probably the most popular of all the web browsers. It can be used with any kind of OS: Mac OS, Chrome OS, Windows, Apple, and Android.

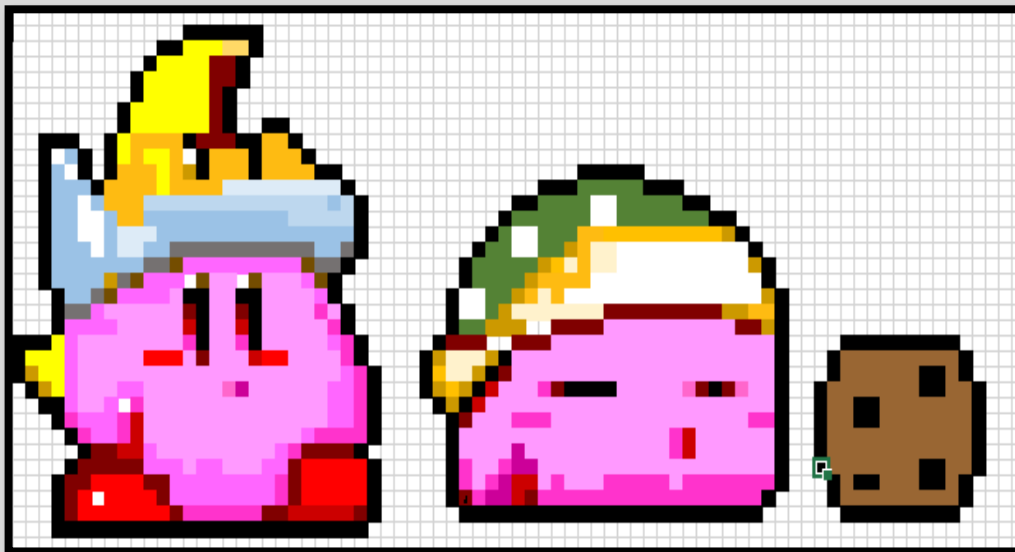

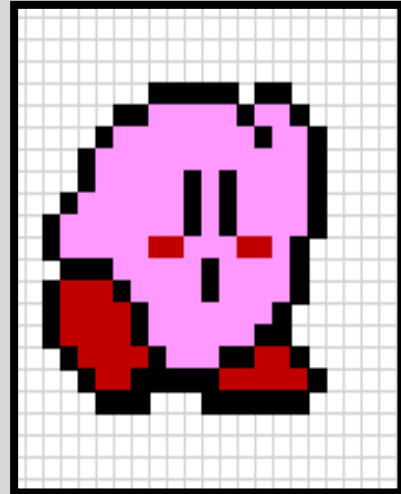

By: Thomas Winkler, Gr. 7

PIXEL ART- Kirby

By: Riley Kozlowski, Gr. 6

For my pixel art, I did different power ups for Kirby. The power ups I created were normal, ice, sword, boomerang, and sleep. There were only a few power ups in Kirby's Dreamland, but later Kirby got a lot of different power up. A few examples of newer ones are ninja, disco, and yo-yo. The reason I did this is because I love Nintendo games and one of their main series, Kirby.

PIXEL ART- Sonic and Tails

By: Nick Kurti, Gr. 6

GAME REVIEW- Simulator Games

By: Nick Kurti, Gr. 6

Simulator Games seem to be taking over Roblox in its already very bad state. Roblox simulators are like Cookie Clicker or Adventure Capitalist, but those games had strategy and deeper mechanics for you to use. Now, these games are actually bottom of the barrel and shriveled up of anything that you could use them for.

There's a simulator for everything; Speed Simulator, Vehicle Simulator, Burping Simulator, Bubble Gum Simulator! If you could imagine an object, there's a 90% chance it's a simulator. Most people dislike them for their repetition. Because well, even the GUIs are the same. They all have this little icon that says Update 3, Update 12, Update 6, just to say how much time people have wasted in thinking these games are GOOD! I don't even know how good these games are because I haven't even played them yet, so I'm going to play them for you!

There are way too many options to choose from, so I'll pick the one that's the most popular game on Roblox; Bubble Gum Simulator. When I first joined the game, I get bombarded with a colorful looking sphere that is bubble gum seemingly floating around. So, what's the objective of this game? Clicking and clicking. **ALWAYS CLICKING.** Doing this increases the size of your bubble and you can sell that bubble for money. After that, you can go shop for better bubble gum, so that you can make a bigger bubble. This just feels barebones. This game has loot boxes to get pets. You need pets to enhance your giant sphere that scares people when they first join.

Bee Swarm Simulator is one that some people actually like. You and your bee collect pollen and honey. You can get upgrades for your backpack, treats for bees, or MORE BEES! It starts pretty slow, but once you get into it, it gets really cool and complex. You can earn quests and get all different kinds of bees. This game is a simulator by title only; it's much better made than any other simulator.

Billionaire Simulator is actually the worst one of them all, in my opinion. It has an annoying GUI, a starter pack that screams in your face like a desperate cash grab, but there is a point. You make buildings for money and get managers to work in the buildings. There is a constant flow of cash and you can upgrade the buildings for the max size and managers.

Ice Cream Simulator- Have you ever hated that ice cream goes away after you eat it? Well, now you can duplicate your ice cream by licking it and you can sell it to get upgrades. There's rebirth and pets and-- Wait up; REBIRTH? Yes, rebirth. You lose all your status but you can use rebirths to do..Absolutely nothing! It's kind of like ascending from Cookie Clicker. You know, all these games look like they are the same games with different coats of paint.

In conclusion...Simulator games are just bad in my opinion. They don't have personality. These COULD have personality I just feel you need passion and integrity.

GAMING: Super Smash Brothers

By: Royal Kozlowski, Gr. 8

January 11, 1999, the popular beast of video games, Nintendo, releases a new game. It is named Super Smash Brothers 64. Being made from the creator of Kirby, Masahiro Sakurai released this game which contained some of Nintendo's popular characters. Link, Kirby, Mario, Donkey Kong, Fox, Yoshi, Luigi, Captain Falcon, Ness, Yoshi, Samus, and Jigglypuff.

The original game was simple and had few stages and few characters, but then it went to Super Smash Brothers Melee. Super Smash Brothers Melee had the original cast, but it added 14 new characters. The

new ones being Bowser, Peach, Dr. Mario, Zelda, Sheik, Ganondorf, Young Link, Falco, Mewtwo, Pichu, Ice Climbers, Mr. Game & Watch, Marth, and Roy.

This game has been around for so long and has a very competitive community. The game had many glitches and tricks that were only usable if you got it perfect. The famous wave dash made the character move while still being able to do all normal moves. Then, there were techs and spikes-everything to make the game more competitive.

Brawl came out for the Wii, and it is considered the worst one out of all the games. It had almost no competitive value and it added a 1% chance of tripping which nobody liked. Wave dashing was removed from the game along with ledge guarding.

This game added 18 new characters. These being Diddy Kong, Meta Knight, King Deedee, Toon Link, Zero Suit Samus, Wolf, Pokémon Trainer, Lucario, Lucas, Ike, Pit, Wario, Olimar, R.O.B., Snake and Sonic and the removal of Roy. The best things about this game is the addition of the stage creator and the story mode that was added.

Then, there was Super Smash Brothers for the Wii U which people saw as an upgrade. Although people were still upset that some competitive aspects were not there, they still had more than Brawl. The game is played competitively and had 21 newcomers. Rosalina, Bowser Jr., Greninja, Robin, Lucina, Corrin, Palutena, Dark Pit, Villager, Little Mac, Wii Fit Trainer, Shulk, Duck Hunt, Mega Man, Pac-man, Ryu, Cloud, Bayonetta, and the Mii fighters. There was the removal of Snake, Pokémon Trainer, and Ice Climbers. The game had continued the story of Smash.

Now, finally Super Smash Brothers Ultimate. Super Smash Brothers Ultimate is the newest game of the series and now the

second best game. Melee holds the top spot but this new game is a runner-up. Returning most of the competitive, 72 characters in total and 108 stages. The game added back all the removed characters and even new characters. They even added a new story-mode which is called World of Light. They even added new characters with all of this new gameplay. The new 11 characters are Daisy, Chrom, King K. Rool, Ridley, Isabelle, Dark Samus, Inkling, Ken, Incineroar, Simon, and Rictor, with DLC on the way. This new game is amazing and I hope for this wonderful game to continue to get bigger and better.

GAME REVIEW- .IO Games

By: Ryan Scudieri, Gr. 6

Over the years, “.io” games have greatly grown in their popularity. Starting with the iconic “Agar.io” then “Slither.io” etc. Now there are over 400 .io games that people play. Here are some of the .io games that I have played:

[Skribbl.io](https://skribbl.io)

[Erth.io](https://erth.io)

[Agar.io](https://agar.io)

[Krunker.io](https://krunker.io)

[Bonk.io](https://bonk.io)

Super Smash Brothers Character Edition Timeline

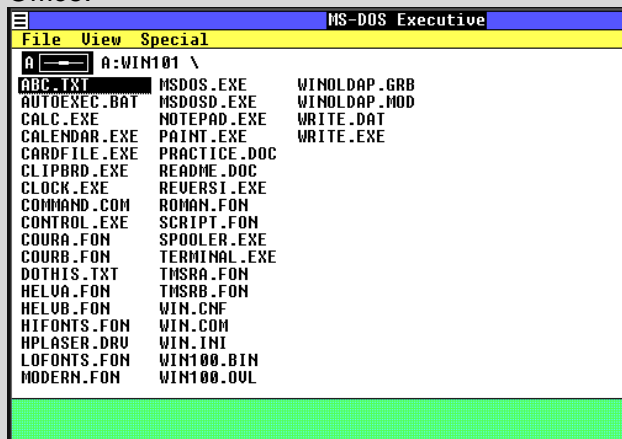

TECHNOLOGY: Evolution of Windows

By: Nick Kurti, Gr. 6

Good old Windows: The marketing world owned by Microsoft in their OS. But really, looking back on it, Windows 1.0 was barely even user friendly.

Windows 1.0 was nowhere near user friendly. There is a website to visit and try out Windows 1.0 by clicking [here](#). Your desktop is actually what would be File Explorer, which has all the files. There is EXE, which is a normal program like Notepad.exe or Calendar.exe. There is DOC and TXT, which are about the same: but DOC files would soon become Microsoft Office.

After that, not much is publicly known. There's only about six paragraphs of the history between Windows 2.x and 3.x as well as the OS/2 format.

Windows 95 was developed after that. Windows was about to get its name. Again, there is a [Windows 95 website you can run here](#). Windows 95 allowed for minimizing, which lets you pause and work on something. This was also the first 32-bit system. Bits mean that 1-bit lets you use 2 characters: 0 & 1. So 32-bit lets you use 64 characters for more flexible kinds of coding.

Before that, a CD-ROM was backed up online code named Rainbow. It was a prototype build of Windows NT that used the Start menu feature. However, the source website is available [here](#). Rumors about Windows Rainbow have spread, like its release in 1993 or what the default browser was. Most of it contains programs like Cat Explorer, which focused on loading high-quality images and vector-formatted text, which you could zoom into without it losing its quality.

Windows 98, Windows NT 4.0 and 50, Windows ME, and Windows 2000 are barely any different to each-other. In my opinion Windows 98 was the best out of them all.

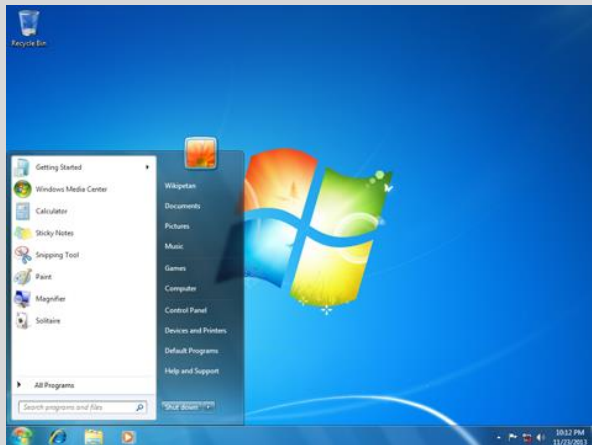

In 2001, we were introduced to Windows XP. There is a screenshot load of Windows XP you can run clicking [here](#). It ran away from the MS-DOS kind of scripting and allowed them to create imagery within a kernel: It's just like a popcorn kernel! When it pops, or released to developers to build on, they start adding heat and flavor to the popcorn kernel. Eventually, it finishes popping and is released. Then, you add extras like buttery security updates and a pinch of e-mail programs.

We are now entering the modern age of Windows! Unfortunately, many people think that Vista is the worst Windows. Vista introduced very nice concepts: A see-through Aero Glass theme, Gadgets you can add on the screen like a clock or calendar, and a double-paneled start menu with icon toggle. Windows XP originally did this, but icons were for everything. At least you can use Vista [here](#).

Windows 7 was nothing new to the table. We got mostly upgraded performance and DirectX 11, which was when 3D gaming processor that was very detailed now. This is PS3 and Xbox 360 eras right now, so Windows stepped up to the game with this DirectX card. Again, you can use Windows 7 [here](#).

Windows 8.1. Here's an example of how much the 2010's were all about people modernizing than anything else: on the left we have pressing the Windows key on Windows 7 and on the right is the same input on Windows 8.1:

Not very appealing to many. And, for the last time, here's an emulator for Windows 8.1 you can go to by clicking [this](#).

And here we are today: Windows 10. Cortana can search your computer straight from the taskbar. Microsoft Edge releases and gets used the least in the world. And, they made the start menu upgrading from

Windows 8's full screen start menu. At HMS, our computers use Windows 10, so you can picture what Windows 10 looks like.

As I mentioned, we have come very far from just a few programs to the world's biggest computer provider. If you want to view a timeline on Wikipedia, you can click [here](#). *For information on Windows 1.0 and 32-bit's meaning, I used Wikipedia as an outsource.*

ORIGINAL ART- Sketch App

By: Stefano Nicosia, Gr. 8

Name: Hayai Gekko (Fast Moonlight) (ha-yl-gecO) (Search both separately)

Series: My Hero Academia

Date of Birth: June 5th

Age: 15

Zodiac: Gemini

Voice Actor: Laura Bailey

Personality: Supporter, Risk-Taker, Athletic

Hero Suit: Basic white jumpsuit with white sneakers

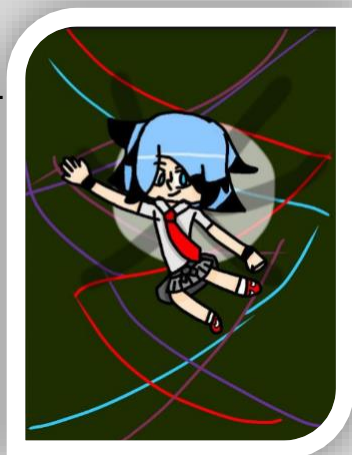

Quirk: Zodiac

Nationality: American-Japanese

Quirk Description: Can use Zodiac to change hero outfit, eyes and base hair color. Power varies on zodiac. Gets side effects when cancels quirk after too long.

Height: 5'1

Weight: 100 lbs.

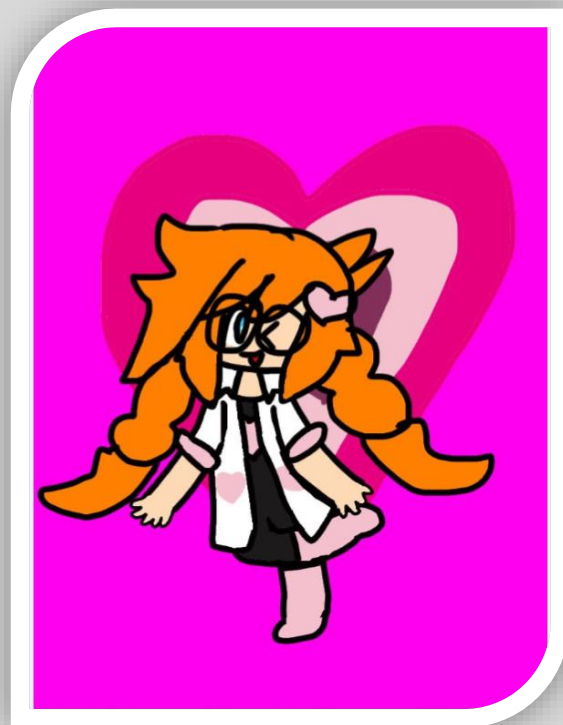

ORIGINAL ART- Sketch App

By: Stefano Nicosia, Gr. 8

The original art below is the character Penny Crygor from the series WarioWare. This drawing using her appearance from WarioWare Gold for 3ds. She's a fun girl that wishes to be a popstar, but she is a scientist, like her over 100 year old cyborg grandfather, Dr. Crygor.

The Sketch Draw and Paint app that I used to make this allows the user to draw and edit images. You can create, explore and share with the world.

ORIGINAL ART- Sketch App

By: Stefano Nicosia, Gr. 8

Equilibrium Chan is the reason for 0 net forces, this was inspired by our recent Science class where we learned about, you guessed it, equilibrium. You can call this a present for Mr. Abdelmalak, our 8th grade science teacher.

ORIGINAL ART- Sketch App

By: Stefano Nicosia, Gr. 8

I drew this for a role-play I'm in on an app I go on daily and I wanted to share this with the readers. An OC (original character) is a little sister of a canon character. When drawing it, I wanted to make it look like a drawing from a 5 or 6 year old since the OC drew the drawing at that age. Sadly, the two sister characters will end up battling thanks to one of them turning evil from being controlled by their own mother.

ARTIST REVIEW- Kohei Horikoshi

By: Stefano Nicosia, Gr. 8

Kohei Horikoshi is the famous Manga artist behind the series of My Hero Academia, Oumagadoki Doubutsuen (Twilight Zoo) and Sensei no Bulge (Barrage).

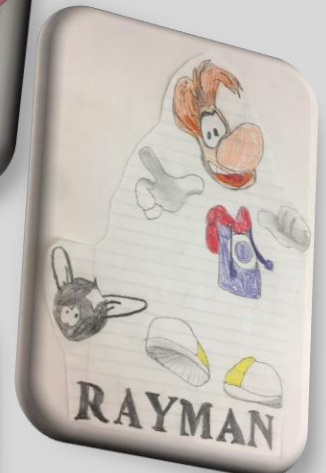

Kohei doesn't only do Manga art, but also fan art that's famous on social media like Twitter.

If I could rate his art on a scale of 1-100, I would definitely go all 100/100, no flaws, no errors, it's just really good!
